

INT	= Internal
CB	= Callback

NetworkRunner

	Awake
RegisterNetworkCallbacks()	INT

All Unity FixedUpdate() callbacks

If PhysicsEngine == None:

PhysX/Box2D AutoSimulate

Fusion Update Loop

RegisterNetworkCallbacks()	INT
IBeforeUpdate()	
ONLY IF the SceneManager is busy AND SceneLoadSpawnMode:Queued (configurable in the NetworkProjectConfig)	
	Process Spawn Queue
ISpawned & Spawned() called on new Spawns	CB
IPredictedSpawnBehaviour.PredictedSpawnSpawned()	CB
Get Incoming Network Updates	
Resimulation Loop Only for Clients in ServerMode and HostMode	
IBeforeClientSidePredictionReset()	CB
State restored to most current Server Snapshot	
IBeforeAllTicks(resimulation = true, ticks)	CB
For each resimulation tick:	
Update Remote Prefabs Create Remote Prefabs Destroy Remote Prefabs	
Player Join/Leave OnPlayerJoined() CB OnPlayerLeft() CB	
<div>Resimulation Tick</div> <div>IBeforeTick() CB</div> <div data-cs="2" data-kind="parent">RPCs are executed</div> <div data-kind="ghost"></div> <div><div>FixedUpdateNetwork<div>aka FUN() for short</div></div><div>FUN() on NetworkBehaviours and SimulationBehaviours</div><div><div>Network Physics<div>If PhysicsEngine != None</div></div><div>IBeforePhysicsStep() CB Network Physics Step IAfterPhysicsStep() CB</div><div>Lag Compensation<div>IBeforeHitboxRegistration() CB Hitbox Manager Execution</div></div></div><div>IAfterTick() CB</div></div>	
IAfterAllTicks(resimulation = true, ticks)	CB
IPredictedSpawnBehaviour.PredictedSpawnFailed()	CB
IAfterClientSidePredictionReset()	CB
Forward Loop	
IBeforeAllTicks(resimulation = false, tick count)	CB
For each forward tick:	
<div>Copy Snapshot from previous</div> <div>IBeforeCopyPreviousState() CB</div> <div data-cs="2" data-kind="parent">Previous State Snapshot copied to new Snapshot. It is only called between ticks N-1 and N where N is the last current forward tick</div> <div data-kind="ghost"></div>	
<div>Update Remote Prefabs</div> <div data-cs="2" data-kind="parent">Only in SharedMode</div> <div data-kind="ghost"></div> <div>Create Remote Prefabs Destroy Remote Prefabs</div>	
Player Join/Leave IPlayerJoined() CB IPlayerLeft() CB	
<div>Forward Tick</div> <div>IBeforeTick() CB</div> <div data-cs="2" data-kind="parent">RPCs are executed</div> <div data-kind="ghost"></div> <div>OnTick() CB</div> <div><div>FixedUpdateNetwork<div>aka FUN() for short</div></div><div>FUN() on NetworkBehaviours and SimulationBehaviours</div><div><div>Network Physics<div>If PhysicsEngine != None</div></div><div>IBeforePhysicsStep() CB Network Physics Step IAfterPhysicsStep() CB</div><div>Lag Compensation<div>IBeforeHitboxRegistration() CB Hitbox Manager Execution</div></div><div>IPredictedSpawnBehaviour.PredictedSpawnUpdate() CB IAfterTick() CB</div></div></div>	
IAfterAllTicks(resimulation = false, tickcount)	CB
IPredictedSpawnBehaviour.PredictedSpawnFailed()	CB
OnChanged() Callbacks	
IAfterUpdate()	CB
If Shutdown requested during FixedUpdateNetwork():	
<div>Shutdown Handling</div> <div>RegisterNetworkCallbacks() INT ShutdownNativeSocket() INT INetworkRunnerCallbacks.OnShutdown() CB</div> <div data-cs="2" data-kind="parent">Release all objects</div> <div data-kind="ghost"></div> <div>DisconnectFromCloud() INT</div> <div>Exit Fusion Update Loop</div>	

All Unity MonoBehaviour.Update() Callbacks

Fusion Render Loop

All Render() callbacks	CB
IPredictedSpawnBehaviour.PredictedSpawnRender()	CB
If Shutdown requested during Render Loop:	
<div>Shutdown Handling</div> <div>RegisterNetworkCallbacks() INT ShutdownNativeSocket() INT INetworkRunnerCallbacks.OnShutdown() CB</div> <div data-cs="2" data-kind="parent">Release all objects</div> <div data-kind="ghost"></div> <div>DisconnectFromCloud() INT</div> <div>Exit Fusion Update Loop</div>	

All MonoBehaviour.LateUpdate()
